DETAILED ACTION

Election/Restrictions

1. Claims 10-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected alternative embodiment, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No.3. The applicant has traversed the election on the grounds that the basic concept and primary structural elements are the same between all the claims. The examiner has taken the argument in to consideration however does not find the argument convincing. The concept might be the same however the structures of the alternative embodiments are so different that they can be considered two different inventions, which require two separate searches, hence placing an unreasonable amount of burden on the examiner.
2. Claim 4 will also not be examined as it refers to the nonelected group of figures 7-12.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No.6001083 to Wilner.

Wilner teaches a hollow needle 101 a fixed sheath 109b a protective sheath 105a and a locking mechanism with a locking slot (figures 7a-7b) and locking projection. The protective sheath is slidably fitted inside the fixed sheath (figures 5-6). The safety indwelling further comprises of a pair of wings 301 and 302 one wing coupled to the protective sheath and one to the fixed sheath. The hollow needle is exposed when the two wings are aligned symmetrically and the protective sheath covers the hollow needle when the two wings are slid in directions to distance the wings from one another.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roz Ghafoorian whose telephone number is 703-305-2336. The examiner can normally be reached on 8:30am-4:30pm.
